MBCR Introduces New Sanitizing Steam Cleaning System *Vapor cleaning removes stains and grime, protects environment*

(Boston, MA) – To ensure the cleanest possible riding environment for its customers, Massachusetts Bay Commuter Railroad Company (MBCR) today announced the introduction of a new vapor sanitizing system to clean passenger coaches. This system safely removes grease, grime and stains in a cost-effective manner without harming the environment.

“A sanitary, comfortable passenger coach is an essential part of a commuter’s experience,” said Richard A. Davey, general manager of MBCR. “The introduction of Advanced Vapor Technologies’ proprietary steam vapor cleaning equipment into service will help us provide cleaner, fresher coaches for passengers during travel.”

By using AVT’s Mondo-VAP 2400 system, MBCR is able to utilize vapor cleaning technology, which eliminates bacteria, while using tap water. The cost effective system removes everything from old gum to stains that previously were impossible to remove. The system works on a wide range of materials, including vinyl, stainless steel, and plastic-type surfaces.

About Advanced Vapor Technologies

Advanced Vapor Technologies (AVT) is the maker of proprietary, water-only steam vapor cleaning and disinfection systems. AVT systems reduce health risks associated with typical chemical cleaners, eradicates a wide range of bacteria and pathogens, improves indoor environmental quality and reduces potential indoor hazards due to reduced chemical use.

About MBCR

The Massachusetts Bay Commuter Railroad Company, LLC (MBCR) is a partnership of Veolia Transportation, one of Europe’s largest passenger transportation companies; Bombardier Transportation, the world’s leader in the manufacture and maintenance of passenger rail vehicles; and Alternate Concepts, a Boston-based transportation operations and consulting firm with expertise in the design, operation and maintenance of rail transit systems. MBCR operates and maintains the fifth largest commuter rail network in the United States under a contract with the Massachusetts Bay Transportation Authority. MBCR provides service to 40

(more)

million passengers a year in nearly 80 cities and towns in Massachusetts, as well as Providence, RI.
